

Meeting 21 December

Harriet Notes	Meeting Comments/Actions
<p>General notes</p> <ul style="list-style-type: none"> - I want to use these meetings to ask questions but sometimes when I don't have any I'm not sure what to talk about. <ul style="list-style-type: none"> - Should I just do a brief update on what I have done (which is basically what this week is)? 	<ul style="list-style-type: none"> - Give heads up if nothing
<p>Literature Review (Topic 1: Should you visualise uncertainty)</p> <ul style="list-style-type: none"> - I have done stuff (Yay) - This is what I have done so far - I want these to be short, manageable, weekly topics <ul style="list-style-type: none"> - Small topics are manageable in a week - Keeping them weekly prevents myself from getting bogged down by a topic that is too large (which is what I feel like Di was concerned about last week) - Also sometimes the topic will change from what I originally intended, and keeping them small stops the entire project from getting derailed - Last week was finishing up the ADHD help sheet and getting back into some sort of schedule (which I have done!) - This week (until Christmas) is about why people don't visualise uncertainty - Next week (but after Christmas) is untangling what we mean when we talk about uncertainty <ul style="list-style-type: none"> - Basically what Di was talking about last week - I have small things I do on the side as well (right now it is culling down the master list and compiling everything I'm supposed to have read). 	<ul style="list-style-type: none"> - Speaking to individual vs group - Take each point and say what could go wrong - Not visualising uncertainty on purpose to misrepresent findings <ul style="list-style-type: none"> - Making a selection introduces bias - Interactive soccer thing as an example of an experimtn
